

Bulletin of the American Museum of Natural History Volume 12

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: ... At several places-the crystals are grouped with their basal planes nearly at right angles to one another, but their cleavage planes are not coincident and therefore such groups cannot be regarded as twins according to the third law (twinning plane the unit rhombohedron). Around the bases of the large crystals and the columns there are numerous small crystals composed of the rhombohedron / and the base, and the under surface of the specimen, as shown on the plate, is coated with such crystals. It is evident that the specimen was attached to its surroundings by the edge. In size the group is about 62 cm. (2 feet) long, 41 cm. (16 inches) wide, and 8 cm. (13 inches) high. Article XV.--NOTICE OF TWO VERY LARGE LOBSTERS IN THE COLLECTION OF THE AMERICAN MUSEUM OF NATURAL HISTORY. By R. P. Whitfield. Plate IX. The Museum received two unusually large specimens of the common marine Lobster, *Homarus americanus* DeKay, during the spring of 1897, both of which were captured off Atlantic Highlands, N. J., by fishermen engaged in that business, and within a short time of each other. The two individuals, although of exceptionally large size, vary but little in their dimensions. The weight of the larger one, while living, was about 34 pounds, and of the smaller one about 31 pounds. The smaller one came into possession of Mr. Alfred Cabassud, who at the time had a restaurant in Lower Broadway, and who presented it to the Museum; the larger one was exhibited at the Castle Garden Aquarium for a time, but neither survived more than a few days, and afterward both were prepared and mounted for permanent preservation. The unusual

size of these specimens has been thought worthy of notice, and a series of measurements has been made of them and given below, one while in a fresh s...
