

International Conference on Advancement of Materials and Nanotechnology (ICAMN-2007) (AIP Conference Proceedings / Materials Physics and Applications)

Advanced Materials and Nanotechnology is a research on Preparation and Application of Advanced Material and Nano-Material at nanometer scale; that is one in a billionth meter in length. Advanced Materials and Nanotechnology is expected to have wide and extensive usage. Pharmaceutical, information and communication technology, electronic and agriculture are some of the industries that will directly benefit from nanotechnology. Demand for technology is at all time high, challenging and complicated. Due to this, scientist and technologist are working hard to produce alternative technology: Advanced Materials and Nanotechnology.
