

International Review Of Cytology: A Survey of Cell Biology: 261 (International Review of Cell and Molecular Biology)

International Review of Cytology presents current advances and comprehensive reviews in cell biology both plant and animal. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research. Articles in this volume include LEM-domain Proteins: New Insights into lamin-interacting Proteins; New Insights into Membrane Trafficking and Protein Sorting; Structure and Function of the Atypical Orphan Nuclear Receptor; Zebrafish Gastrulation: Cell Movements, Signals and Mechanisms; Calcium Dynamics: Spatio-temporal Organization from the Subcellular to the Organ Level; New Technologies Used in the Study of Human Melanoma.
