

The MAK-Collection for Occupational Health and Safety: Part I: MAK Value Documentations (The MAK-Collection for Occupational Health and Safety. Part I: MAK Value Documentations (DFG))

This volume provides documentations for the established MAK values (maximum workplace concentrations) of selected occupational toxicants, including an authoritative review of the available toxicological studies and data. For each substance, the toxic effects, mechanisms and modes of action, toxicogenetics and metabolism, effects in man and animals are described. In addition, the carcinogenic, germ-cell mutagenic, sensitizing or skin-resorptive effects as well as their toxicity to the reproductive system are evaluated, plus basic physico-chemical data are provided. The documentations are thus not only essential for the application of MAK values but also provide a concise toxicological overview for each substance.
