

## Paediatric Respiratory Examination: CD-ROM

Paediatric Respiratory Examination sets a unique standard in multimedia teaching. Students and doctors are presented with video clips of clinical cases which demonstrate the clinical signs for inspection, percussion and auscultation that are essential for good clinical practice. Areas covered are history taking and examination, auscultative findings of children with respiratory problems, bronchoscopy and surgical videos, and basic spirometry. Not only a teaching aid for students, this will also be a useful revision aid for general practitioners.
