

Report on the natural history and habits of Salmonoids in the Tweed and its tributaries

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1867 Excerpt: ... enter the river as clean fish in every month of the year, and leave as kelts, or spawned fish, principally in the months of March and April, and a few in May. 6. They come from the north, and when nearing the mouth of the river they hug the shore. 7. They enter with the flow and return with the ebb tide, for a considerable time before leaving tide-mark. When the wind blows N. by E. they enter more freely than when it blows from any other direction. 8. In shoals in the sea--get broken up when in the river. 9. They enter the river most freely after she is properly cleaned out by summer and autumn floods; when small and filthy they dont pass beyond tide-mark, and seldom so far. 10. Herrings, haddocks, whittings, sand-eels, and other small fish, such as the sea-screw or sandy-louper, &c. &c. &c. 11. They grow slowly, but fatten rapidly. 12. Salmon and trout in May, grilse in the end of July and all August and September. 13. Seals and porpoises upon the adults when they near the river; the colesay, codfish, &c. &c., when they enter the sea as smolts. 14. No fixed place--generally about the onset of the fins; all infested much alike. 15. In two or three days. 16. It is an understood fact that the seaside fisheries kill comparatively few trout; it is a rare circumstance to find them in the stake or bag net. I cannot assign a reason for this. 17. They at once deteriorate, and much faster in warm than cold weather. 18. The spring and summer fish of all denominations seem to enter the river under the supreme laws of nature as food for man. Those that enter in October and November are our principal breeders; for what other purpose they enter the river seems clothed in mystery. 19. Salmon are

best in May and June, grilse in July and August. 20. 1st...
