

The first book of architecture: by Andrea Palladio Translated out of Italian, with an appendix touching doors and windows, by Pr Le Muet Translated ... illustrated with above seventy copper cuts

The first book of architecture: by Andrea Palladio Translated out of Italian, with an appendix touching doors and windows, by Pr Le Muet Translated ... illustrated with above seventy copper cuts

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. The eighteenth-century fascination with Greek and Roman antiquity followed the systematic excavation of the ruins at Pompeii and Herculaneum in southern Italy; and after 1750 a neoclassical style dominated all artistic fields. The titles here trace developments in mostly English-language works on painting, sculpture, architecture, music, theater, and other disciplines. Instructional works on musical instruments, catalogs of art objects, comic operas, and more are also included. ++++The below data was compiled from various identification fields in the bibliographic record of this title. This data is provided as an additional tool in helping to insure edition identification:++++Cambridge University LibraryN031530With a half-title and an additional engraved titlepage.London : printed for S. H. and H. T.; and sold by James Knapton, Robert Knaplock, John and Benj. Sprint, Daniel Midwinter, Ranew Robinson, William and John Innis, and John Osborne, 1724. [4],238p.,plates : ill. ; 4
