

Select Specimens of Natural History, Collected in Travels to Discover the Source of the Nile, in Egypt, Arabia, Abyssinia, and Nubia (Volume 5)

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1790 Excerpt: ... 224 port, called Myos Hormos, which commentators have called the Port of the Moufe, when they should have translated it, the Harbour of the Mufel. This fifth contains often pearls of great beauty for lustre and shape, but seldom of a white or clear water. Pliny relates this to be the case in the Ita Han seas, and also in the Thracian Bosphorus, where he observes they are more frequent. The second sort of shell which generally contains the pearl is called Pinna. It is broad and semicircular at the top, and decreases till it turns sharp at the lower end, where is the hinge. It is rough and figured on the outside, of a beautiful red colour, exceedingly fragile and sometimes three feet long. In the inside it is clothed with a most beautiful lining called Nacre, or mother-of-pearl, white, tinged with an elegant blush of red. Of this most delicate complexion is the pearl found in this fifth, so that it seems to confirm the sentiments of M. Reaumur on the formation of pearls, that they are formed of that glutinous fluid which is the first origin of the shell. That it forms the pearl of the same colour and water that is communicated to it from that part of the shell with which it is more immediately in contact, and which is generally observed in the pinna to be higher in colour as it approaches the broadest, which is the reddest end. Upon the mature consideration, I can have no doubt that the pearl found in this shell is the penim or penim rather, for it is always spoken of in the plural, to which allusion has been often made in scripture. And this derived from its redness is the true reason of its name. On the contrary, the word pinna has been idly imagined to be derived from penna, a feather, as being

broad and round at the t...
